EDUCATION

- Bachelor of Computer Science**
Computer University (Mandalay), 2017

LANGUAGE

- English: Intermediate
(Conversational Proficiency)
- Burmese (Native)

TECHNICAL SKILLS

Backend

- Java
- Spring Boot
- Spring MVC
- Spring Security
- Spring Batch
- Hibernate/JPA
- REST APIs

WORK EXPERIENCE

New Tara Co., Ltd

Java Backend Engineer

Remote – Thailand

Jan 2026 – Current

- ❖ Developed and maintained backend services for Ecommerce and Logistics systems using Java Spring Boot and MySQL.
- ❖ Designed and implemented RESTful APIs for manual order processing, shipping fee management, parcel creation, and pickup requests.
- ❖ Integrated Ecommerce and Logistics workflows including parcel registration, warehouse transfer creation, and delivery flow testing.
- ❖ Implemented international marketplace features across products, sellers, categories, wishlists, carts, and banners.
- ❖ Implemented Lazada CSV product import functionality using Spring Batch with optimized batch processing logic.
- ❖ Handled CI/CD deployment workflows on DigitalOcean using GitHub Actions, branch-based environments (UAT/Production), backend issue resolution, database updates, and production support

RUISI International

Java Backend Developer (Freelance)

Remote – Singapore

July 2025 – Dec 2025

- ❖ Worked on backend development of medical applications using Spring Boot, Spring Security, JWT authentication, JPA/Hibernate, PostgreSQL, and MapStruct.
- ❖ Designed and implemented RESTful APIs for patient registration, appointment booking, and reporting features, including WebSocket (STOMP) integration for real-time notifications.
- ❖ Applied Hexagonal (Ports and Adapters) architecture to separate domain logic from persistence and delivery layers.
- ❖ Contributed to backend development of a blockchain-based NFT marketplace and Protein Engineering platform.
- ❖ Integrated external services including OpenAI APIs for medical report diagnosis and insights.
- ❖ Deployed Spring Boot applications on AWS EC2 using Linux service configuration and managed backend deployment.

Frontend

- React
- JavaScript
- HTML/CSS
- Bootstrap
- JQuery
- LitElement
- GWT

Database

- MySQL
- PostgreSQL

Cloud & Tools

- AWS EC2
- DigitalOcean
- Docker
- GitHub Actions
- Git
- Jira
- Confluence
- Notion

Other Languages

- PHP
- Golang
- Python

SM Engineering

Yangon, Myanmar

Software Developer (Frontend & Backend) May 2022 – Apr 2025

- ❖ Developed and maintained scalable **web applications** using **Java**-based framework (**Google Web Toolkit**).
- ❖ Maintained and enhanced **POS web** and **Android applications** using **LitElement** and **Android (Java)**.
- ❖ Integrated **REST APIs** into **web** and **Android applications** to implement new features and reports.
- ❖ Designed and implemented **RESTful APIs** using **Golang** to support integration between web and mobile platforms.
- ❖ Managed and enhanced **websites** using **PHP, HTML, CSS**, and **JavaScript** ensuring responsiveness and cross-platform compatibility.
- ❖ Resolved bugs and issues to enhance website loading speed and performance.
- ❖ **Created** and **modified Python scripts** to send local POS sales data to cloud server.
- ❖ Collaborated with the support team to design, develop, and implement new functions and features.

Digital Laboratory Myanmar

Mandalay, Myanmar

Product Support Engineer

Oct 2020 – Apr 2022

- ❖ Answered technical inquiries from Japanese customers about the partner company's cloud software products by email per day.
- ❖ Created 7 README digital technological guidebooks (PagerDuty, Smartsheet, etc.) along with other team members.
- ❖ Created user manual documentation and video recordings for the usage of the partner company's cloud software.
- ❖ Learned, researched, and made presentations about various cloud software products.
- ❖ Assisted with tasks for marketing activities as a member of the Scrum Team.

PERSONAL PROJECTS

Project Name: Employee Management System

Technologies: Spring Boot (Backend), React (Frontend), MySQL (Database)

- ❖ Developed a role-based system for managing employees, attendance, and leave requests.
- ❖ Implemented authentication and authorization using **Spring Security**.
- ❖ Built RESTful APIs for employee management, attendance tracking, and leave request workflows.
- ❖ Configured Docker-based CI/CD pipeline using GitHub Actions for automated build and deployment.
- ❖ **Demo Video:** <https://www.loom.com/share/9a29c4ff101f407093106f5f1ad64343>
- ❖ **Backend Github:** <https://github.com/Myat-Noe-Wai/employee-management-system>
- ❖ **Frontend Github:** <https://github.com/Myat-Noe-Wai/ems-frontend>

Project Name: Student Management System

Technologies: Spring MVC, Thymeleaf, MySQL, HTML, CSS

- ❖ Developed a role-based student management system with admin and student portals.
- ❖ Implemented admin features for managing students, teachers, courses, and user assignments.
- ❖ Students can log in to mark attendance, view attendance records, and upcoming class schedules.
- ❖ **Github url:** <https://github.com/Myat-Noe-Wai/student-management-system>
